

Add STB Profile to Device				
Assign a Profile to the Apple TV using the STB APIs				
On the Apple TV navigate to: Settings > System > Reset and select “Reset”				
Complete the Apple TV setup so a new device activation completes and the profile is installed				
Verify that the profile status is now “pushed” using the STB APIs				
If Automatic Authentication can be completed without a Profile User Token ensure your device and or network are setup appropriately				
Add Developer TV Provider to Device				
Navigate to: Settings > Developer > TV Provider and select “Add TV Provider”				
Fill out details below as they were entered on device				
	Identifier			
	Name			
	Auth URL			
Ensure the Authentication Schemes are setup with SAML set to OFF and API set to ON				
Select “Done”				
Enable Set-Top Box Mode				
Navigate to: Settings > Developer > TV Provider > Set-Top Box Mode and select “TV Provider”				
Choose the TV Provider added above to be tested				
	App Bundle Identifier			
Select “Set-Top Box Mode” to toggle it “ON”				
Select “Use Profile User Token” to toggle it “ON”				
Select “Remove Profile” to toggle it “ON”				
Zero Sign-On		Validations	tvOS	Notes
1. Uninstall the TV Provider app to clear any settings, state or authentication information 2. Re-Install the TV Provider app 3. Sign out of TV Provider Authentication 4. Navigate to: Settings > Developer > TV Provider > Set-Top Box Mode 5. Select “Test Out of Box Flow” 6. Go through the Out of Box Flow until you get to the TV Provider section	Ensure the account username is shown in the paragraph of text “... and you’ll be signed in as ...”			
	Ensure the default focused button says “Continue” and does not say “Sign In”			
7. Press Continue 8. Finish the Out of Box Flow 9. Launch the TV Provider app 10. When prompted for TV Provider permission select “Allow”	Ensure the application is automatically authenticated on launch			
Auto Authentication Template Usage		Validations	tvOS	Notes
1. Navigate to: Settings > Accounts > TV Provider and select “Sign Out” 2. When prompted to confirm Sign Out select “Sign Out” 3. Select “Sign In” and choose the TV Provider to be tested	Ensure the autoAuthenticationTemplate is used - At the top there is a logo - Underneath the logo is a TV Provider defined title - Underneath the title is a TV Provider defined paragraph - Underneath the paragraph is a default button with the label “Continue” - Underneath the “Continue” button is an optional TV Provider defined button - At the bottom of the template is a label for the automatically discovered username			
	Ensure the logo looks good in dark mode			
	Ensure the logo looks good in light mode			
	Ensure the title makes sense and does not contain any typos			
	Ensure the paragraph makes sense and does not contain any typos			
	If there is a second button ensure the title makes sense and does not contain any typos			
	Ensure the username label contains the account username			
4. Press Continue	Ensure the account name is displayed to the right of “Sign Out” button			
Opt-Out		Validations	tvOS	Notes
Ensure that the TV Provider has at least one opt-out mechanism for launch. (Customer Service, web portal, on-device opt out)	For customer service, web portal, app or any option off device please get directions from partner to validate. For on-device opt out please use the validation below.			
1. Navigate to: Settings > Accounts > TV Provider 2. Select Remove Profile 3. Confirm Remove Profile	ⓘ If you are using generic profiles, ensure the userToken contains unique information such as the Profile UUID to properly support Remove Profile. Ensure a message is presented informing you of a successful profile removal. - The Title should be “TV Provider Profile Removed” - The Description should be “The profile was successfully removed and the association with the TV Provider has been disabled.”
